Storages Sales & Engineering...

RACKS

- * Heavy Duty Storage racks
 - Adjustable Pallet Racks
 - Drive-in-Racks
 - Long Span Racks
 - Mushroom Grooving Racks (GI Racks)
 - Warehouse Racks
 - Cold Storage Racking,
 - Racks for Food Processing Industries
 - Double deep racking System
 - Narrow Aisle (VNA) Racking
 - Super Market Racks
- * Compactor-Mobile Racking System
- * Cantilever Racks
- * Mould Racks
- * Mezzanine Floors (Multi Tier) Racks
- * Slotted Angle racks
- * MS Steel Pallets-Flat, Box, Foldable,
- * SS Wiremesh Pallets,
- * Plastic mould Pallets, Oil drum Pallets,
- * Industrial Lockers
- * Provide system-as per the customers need and space available.

MATERIAL HANDLING EQUIPMENTS

- * Stackers, Fork lifts.
- * Reach truck,
- * High Lift Narrow Articulated Truck
- * Moveble Trolleys, Hand Pallet truck
- * Scissor Lift, etc

OTHER ENGINEERING

www.addonindussolutions.com

Complete Solution from one Purveyor

We are.....

...We are proud to provide industrial racking solutions for our customers. We introduce ourselves as prominent industrial solutions provider of heavy duty storage Racking Systems in all its category used for different material handling applications at different levels in various industries and sectors. Mainly are,

- * Automobiles, Engineering,
- * Mushroom & Food / Beverages , Winery, Coldstorage, etc.
- * Pharmaceuticals , Super Market,
- * Warehouse-logistic, Business Houses ,
- * Hospitals, and Retailers.

We also Design & Supply Racks & MHE as per the customers requirement and the space /area available. We have different types of solution for Racking that are suitable for your physical conditions to your warehouse (storing areas) business process and logistic activities.

Our racks made out of CRF sections which can take maximum uniformly distributed load (UDL) per level by using newest MHE . The racks can be provide in maximum height without any joint such as welding , bolting. Even one can freely & easily change the loading levels upwards and downwards as per actual needs.

The main target we have, that has got all kind of large stores, pharma industries ,logistic firms and industrial warehouses on its tender, is to serve the demand just in time with full satisfaction, by knowing that the main profit is being together with you in the future. We as a company, that has its main principle of Customer Satisfaction to its services, by improving technology and human resources to meet the need of desires.

For all your requirement, providing solutions for ; stores and retrieve of material to racking systems, please call us we will provide reliable , fast complete solutions to your satisfaction..

FEATURES:

- >> Optimum utilization of storage space.
- >> Appropriate design to suit Steady , Adjustable, Stackable solutions.
- >> Easy to installtion , dismantle again relocate and reconfigure.
- >> Adjustable loding levels upwards and downwards.
- >> Wide range of sections suitable to accommodate required loads.
- >> Considerable & variety range of required accessories.

SERVICES:

Consultancy
Installation
After Sales Service

Smart solutions in full system design.

Adjustable Pallet Racks System

Effective Storage Capacity-Smooth edges-Easy working

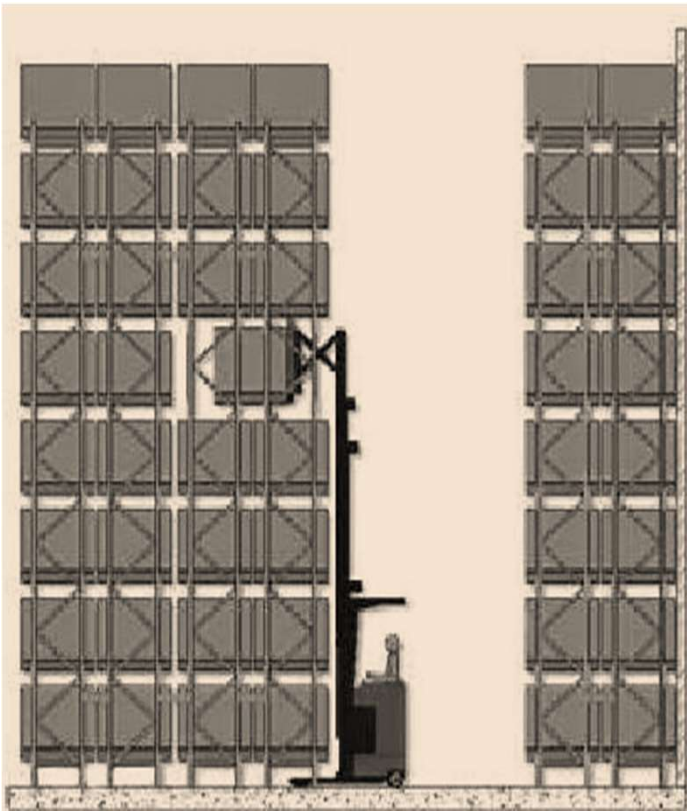

This system useful for maximum utilization of space available.

Product Features :

- * Efficient Storage Capacity.
- * Direct access to every pallets.
- * Easy retrieve and store of pallets.
- * Easy Pallet location identification.
- * Control on stock and inventory
- * High level of Storage accumulation.
- * Make Inventory control easy.
- * Pallets can retrieve/store without relocating

Double Deep Racking System

* Appropriate for large bulk material storage * Less number of access aisles

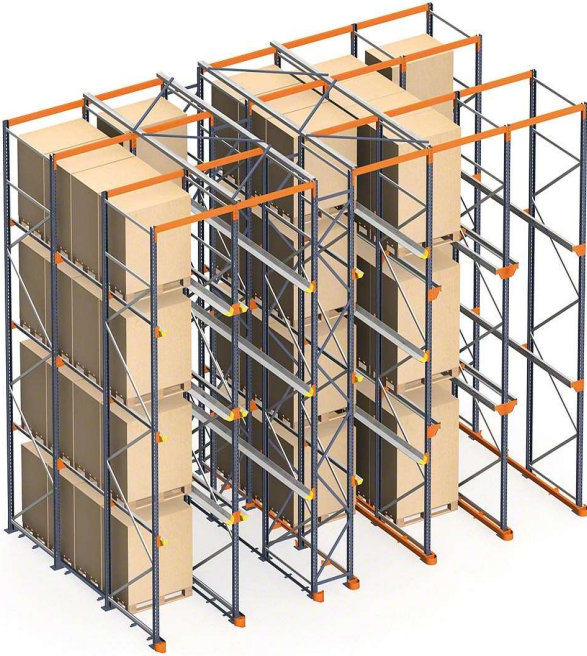

Double deep pallet racking is ideal for high storage density requirements. The racking system having double deep arrangement for storing & retrieval of pallets

Product Features :

- * Prudent use of floor space.
- * Provide to store pallet two deep
- * Enable excellent storage efficiency.
- * Ideal for warehouse.
- * Store density increasd.

Drive-In-Racks System

Efficient Bulk Storage System with High Storage Density

This storage system allows pallets to be supported vertically and in multiple depths. Such types of racking suitable for filling large area of warehouse or stores area with multi deep, multi wide and multi height. This usually specified for FIFO storage solutions.

This system based on the storage by accumulation principle by stacking large volumes of single SHU simultaneously .

The system allow to store numbers of pallets in depth .

Product Features :

- * Can work on FIFO system.
- * Suited for batch storage.
- * High storage capacity
- * Efficient bulk storage system.
- * Pallets stores on cantilever rails.

Long Span Racks System

Trouble free accessibility to levels . Easy to installed & managed , Easy to plan

LSS- Heavy duty long span shelving is base on frame and load beam system which caters easily for large bulk items . This system designed as per requirement of customers. This can be designed for store of heavy and medium material load as well.

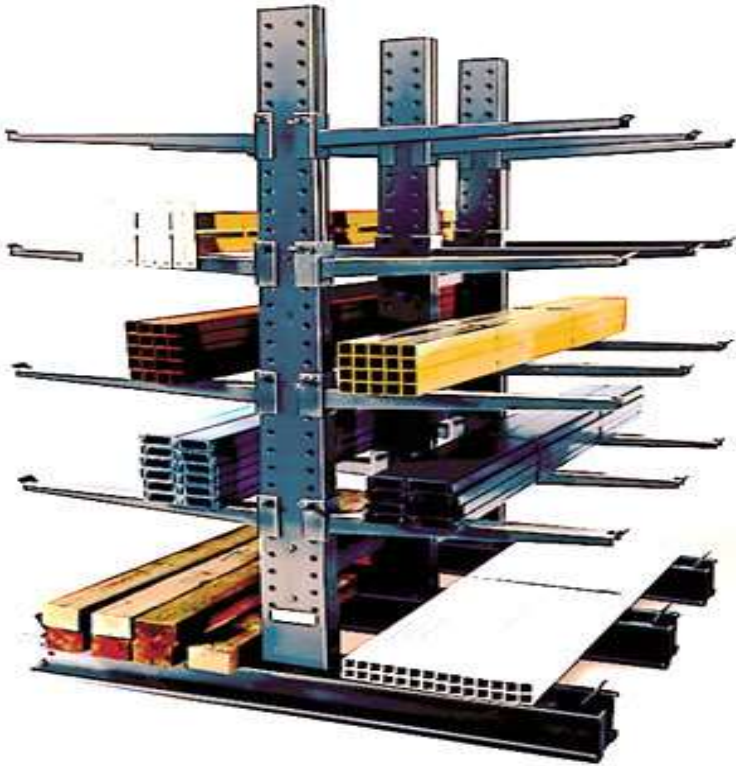

Product Features:

- * Easily configured to meet requirement.
- * Adjustable beam levels asper pallet hight
- * Easy accessible to pallets.
- * Aisles designed as per MHE
- * Can manage non uniform loads.
- * Easy installation.
- * Cost effective solution.
- * Can be operate manually or MHE .
- * Best possible use of available height .
- * various combinations to suit needs of area.

Cantilever Racks System

Suitable to bear long & awkward loads

Cantilever racking is most suitable for different shaped/size and/or varying length products that need organized storage with safe and secure retrieval. It is available in single sided and both sides with multilevel, thus, increasing the capacity of available storage space. It makes easier to fork-lift material apart from allowing manual shifting. All levels of such racks are easily accessible and results in reduced handling time. This can design as a customized storage system for unique requirements and help to improve the productivity and efficiency.

The system is Suited for :

Pipes, tubes, aluminium sheets, flake board, metal /steel sheets etc..
Lengthy, bulky and odd shaped

Product Features:

- * Ideal for bulky, long products.
- * Easy to install, no maintenance and can withstand rugged handling.
- * Customizable as per the precise needs
- * Easy accessibility for inventory.
- * Designed to handle long and awkward loads that are not palletised.
- * Increases storage capacity with utilization of both horizontal

Industrial Lockers

Company employees Personal Locker

Industrial Lockers provided individual locking arrangement makes storing of items easier and safe. Especially useful for company workers to keep their shoes, tools uniforms etc.

Product Features:

- 1) Individual Locking System.
- 2) Duly powder coated.
- 3) Can be available in 6,9,12 & 18 pockets
- 4) Most suitable for: Company employees workers-staff personal locker, Club Members, Student, etc.

Mezzanine Floors Racking System

Reduce cost of construction & Effective use of space

Mezzanine Floor System is fast installation. System supposed at achieving additional space for storage or office in a cost effective way. This system can expand the storage area without the need for any additional material handling equipment. Mezzanine racks can increase the storage capacity of any place to a great extent. The floor create additional floor space

Product Features

- * Economical compared to concrete construction
- * Highly portable. Can be easily enlarged modified or moved
- * Free standing and easy to install in existing building
- * Available with either metal or wooden flooring
- * Gives additional space without adding rateable value
- * Reduced cost of construction by allowing efficient use of space.
- * Can be design as per customer requirement

Compactor (Moveble Racking System)

Ideal to store precious items & official files

Compactor an Mobile Shelving storage system shall be mechanically assisted type mobile racking system consisting of modular components with intermediated boltless shelving. This is an space saving storage system with storage units mounted on mobile trolleys, thereby eliminating infertile aisles. It has a minimal maintenance with no service costs. The system shall be provided with a centralized locking arrangement fitted to the last mobile unit for locking of the entire compactor tile storage system. Safety locking arrangement consists of Push pull knob shall be provided on each modular unit such that the unit will not move when the operator enters the aisle.

This system is ideal for storing files, stationary, bulk documents, manuals, tapes, computer disks, delicate items, laboratory equipment, packaging material ,Q.A.D for secure art & drawing, confidential documents,

Financial Institutions, Hospitals & Hotels, and other high value items with restricted access.

Product features:

- 1) Reduce risk of injuries.
- 2) Save time & simplify picking operation
- 3) Recover floor space .Better use of Space: Only one aisle is needed between run of shelving
- 4) Easy and smooth movement. The system can prevent access by unauthorized people. It also limits the spread of dust etc.

Mushroom Growing Racking Systems

Most suitable for cultivate and pay off value

Mushroom Racks are available in GI material. Height and length is no constrain for growing racks. Also suitable for food processing units. Can be made after understand actual requirement of customers.

Product Features :

- 1) Steady design.
- 2) Adjustable shelves and add-on structure.
- 3) Easy to assemble and dismantle
- 4) Effortless for smooth operation
- 5) Low maintenance cost.
- 6) Very Economical

Mold Rack

Organise moulds in a elegant mode . Customised

Mould racks are ideal for easy storing and retrieving heavy moulds, dies & electric motors etc. These racks have one side drawers can pullout manually making the simple access is perfect for storage of moulds, engine parts, dyes, fixtures. The shelves can be locked safety purpose.

Product Features :

- 1) Can organise moulds in a very elegant manner at a very low price.
- 2) Customization of Racks is possible
- 3) Useful for inside shop floor near to relevant machine for easy access and time saving.
- 4) Can be extended/possible to meet ever-changing storage requirements with add on units.
- 5) Duly powder coated.
- 6) Easy to Assemble and Dissemble

Multi Tier Racking System

Storage Space at Multiple levels with clear access from all sides

MTR, Multi tier racking is most suitable for storage of items at multiple levels as this has provide enough space at multiple levels as a result maximum utilisation of vertical space. Can be designed to be use as per customer requirement.

Product Features:

- 1) Each Level of storage rack has clear access from all sides.
- 2) High rise racking . Maximum use of available vertical height.
- 3) Easy for assembly.
- 4) Duly Powder coated.
- 5) No welding, easy for interchange.
- 6) Economical.
- 7) Complete with catwalks , staircase and railing.

Very Narrow Aisle Racks

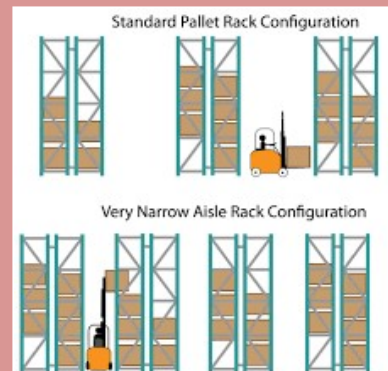

Perfect Solution for Warehouse & Large Industries

Narrow Aisle Racking is one of the most popular forms of storage system throughout the world today. Narrow Aisle Pallet Racking is the perfect solution to make the most out of their warehouse storage space. The space-saving principle behind the system is fairly simple; increase your storage density by reducing the amount of floor and cubic space occupied by the service aisle.

Product Features:

- * Direct access to all pallet locations
- * Random storage allocation possible
- * Maximise Floor Space, allowing to make better use of the saved space
- * Maximise Vertical Storage Space, allowing to take full advantage of all available storage space.

Super Market Racks

Ideal for Malls

Racks make the best use of space vertically. Super market racks are especially more convenient for malls, retail outlets vegetable shops and grocery stores. They are often used when a business needs maximum storage of small utility items within a limited area.

The racks can also be adjusted and rearranged as often as needed so your display is eye-catching, easily noticeable and fresh. As well, the horizontal depth of each shelf can be configured.

Product Features :

- * Easy noticeable display items
- * Maintenance free.
- * Easy installation , easy to shift
- * Cost effective- economical

Material Handling Equipments

Solution Provider for following MHE brands

Battery operated stacker

Electric stacker

Reach Truck

Dock Leveler

Mobile Scissor Lift
